Winkhaus STV EntryGuard™

A purpose designed door locking system with integral guard bar

- Far stronger than a flimsy door chain
- Not reliant on screws into door face or frame
- Can be left permanently engaged
- Deters unwelcome callers
- Provides peace of mind for those living alone
- Can be used for front or back door applications
- Innovative security and safety in one product
- 3mm thick integral heavy duty guard bar
- Unique disengagement by keyholder from **outside**
- Authorised keyholder can disengage EntryGuard™ from the outside by 45 degree turn of key
- Easy to use turn knob designed with the elderly and infirm in mind
- Securely locates into full length steel keep rail
- Extends the family of STV Security Locking Systems and is also available with the Automatic AV2 Locking System¹
- Meets the requirements for physical security in 'Secured by Design schemes'
- Patented design

¹ Not with disengagement from the outside.

STV EntryGuard™ High Security Locking System specification

- EntryGuard™ available either as M2 or M3 version (2 or 3 hooks)
- Lever or key operated versions
- Can be fitted into the same sash and frame preparation as the popular STV Cobra™ M4 lock
- Keyholder disengages by simply turning the key an additional 45 degrees
- Choices of internal knob design to match your door furniture
- EntryGuard™ is an option to our highly successful STV Door Locking System

EntryGuard™ illustrated in the open position

EntryGuard™ provides peace of mind for those home alone

For the security of external doors. For timber, PVCu, Steel, Fibreglass and Composite doors.

STV-systems for all security requirements.

- Optimum Security
- 25mm throw steel hooks
- Compression adjustment in the keeps
- Continuous keep rail
- Secure locking mechanism
- Steel latch and dead bolt
- Easy key insertion

Winkhaus, in combination with the door manufacturer provide an STV system which considerably contributes to the security requirements of external doors. Winkhaus STV is a system comprising of a number of ideally matched components: robust internal components and precision engineering combine to provide an intelligent construction with an easy to operate locking mechanism, together with the highest possible weatherseal compression.

The modular construction of Winkhaus STV system helps to ensure the simple adaptation and fitting to all types of external doors, independent of their material and construction.

The Security Door Locking system (STV) from Winkhaus, in all forms, acts as a formidable deterrent to forced entry attack.

Further information on the full range of STV Hook Locking Systems is available on request.

Safety and Security for the Elderly

Looks very quiet - think I'd better lock up..

...engage my EntryGuard.

Who's this?.....It's only the nurse.

Better let her in. "A simple turn of the knob"

"Hello, nice to see you. Come to check up on me?"

Arriving home from work

...Arriving home, no need to deactivate EntryGuard from the inside

...ah yes, an extra turn on the key

"Hi, I'm home!"

The importance of safety for toddlers

I wonder if I.....

why can't I

"You know you shouldn't try to go outside on your own!"

Security and safety is not just for front doors

I think the empties must be at the back of the house

"Would you like to pay today madam"

"Just a minute, I will open the door"...

A late arrival home at night

"I hope that no-one wakes - it's so late"

"Nice to see that they kept Entryguard active"

"As I thought no-one stirred"
