

INSTRUCTIONS FOR STRAIGHTAWAY 216 (DOUBLE PARALLEL TRACK)

MAXIMUM WEIGHT OF DOOR 150kg (330 lb).
 MAXIMUM DOOR HEIGHT 2.7m (9ft).
 TIMBER DOOR THICKNESS 35mm TO 44mm.
 METAL DOOR THICKNESS 40mm MINIMUM.

COMPONENTS:

- 2-16 STEEL TRACKS
- 2-130 DOUBLE SIDE WALL BRACKETS
- 2-132 LOCK-JOINT DOUBLE SIDE WALL BRACKETS
- 2-051 CLOSED END PIECES
- 2-248 FOUR WHEEL HANGERS (TIMBER DOORS)
- 2-249 FOUR WHEEL HANGERS (METAL DOORS)
- 44-1 STEEL CHANNELS
- 44-2 ALUMINIUM CHANNELS
- 44-010 CHANNEL LUG PACK
- 44-011 CHANNEL SHOES
- 95-605 BOW HANDLE STEEL
- 95-616 FLUSH HANDLE
- 3026.112 M12 'STAYTITE' NUT
- 3029.135 M12 'SHAKE PROOF' WASHER
- 44-319 ROLLER GUIDES
- 44-347 CONCEALED GUIDES
- 2-718 TRACK END STOP

NB

These instructions should be treated as general guidance instructions; variations to the procedure may change depending upon site requirements.
 Read the whole of the instructions before commencing installation.

TIMBER DOORS
(For metal doors see next page)

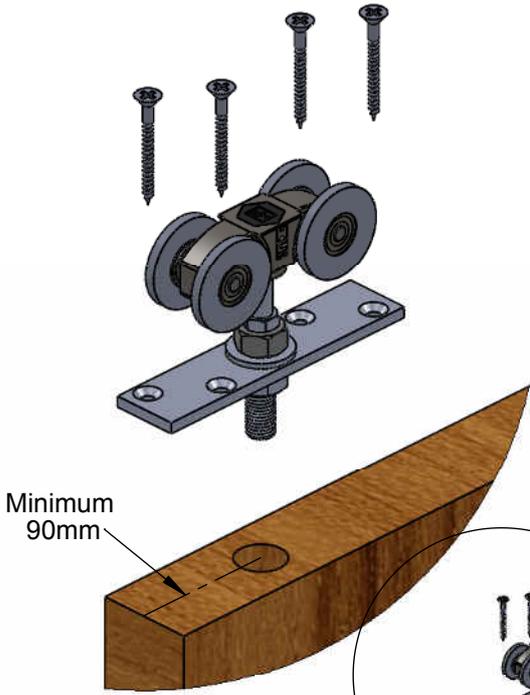

FIG. 1

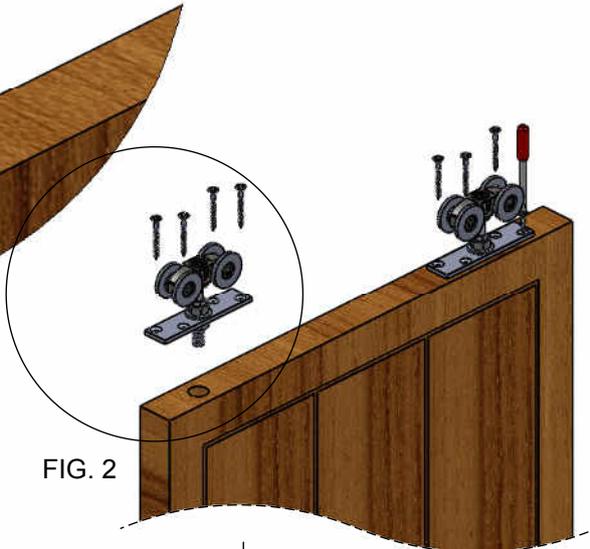

FIG. 2

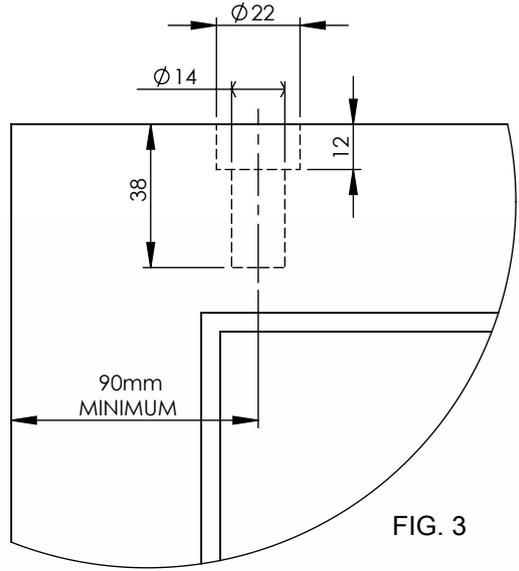

FIG. 3

Drill holes on top edge of door for pendant bolts, make recesses for nuts allowing 6mm lateral movement, as shown in fig.1 & 3 (timber doors only).

Fit **Hanger assembly** with top plate positioned in line with the holes on the top edge of the door. See fig.2

Fit **Bottom Concealed Guides** on the bottom edge of the door using the appropriate fixings supplied as shown in fig.4 & 5.

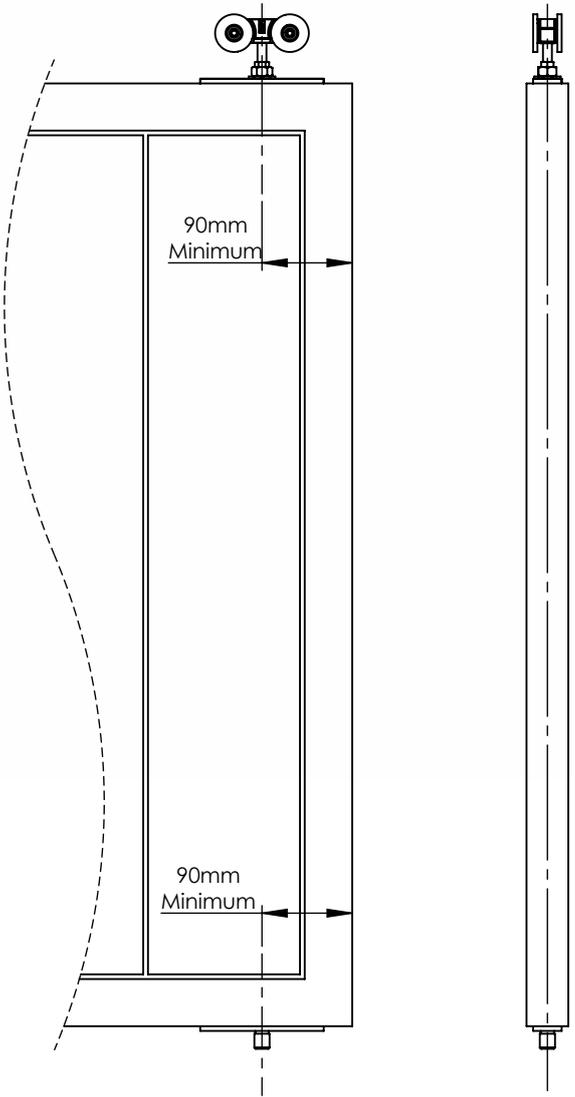

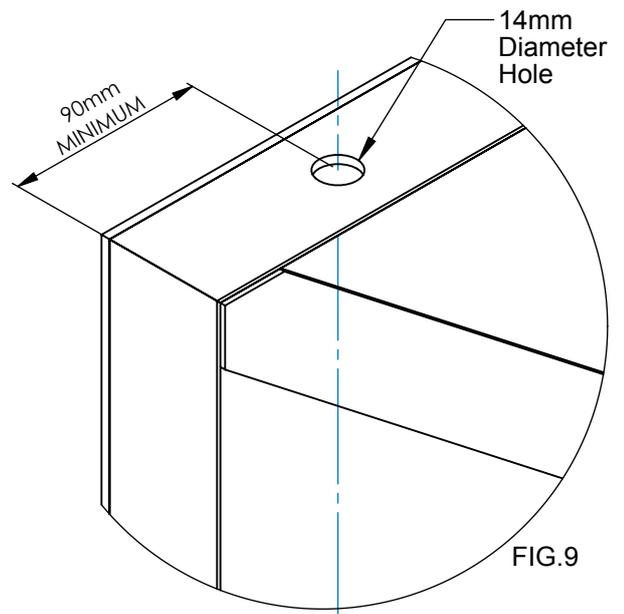

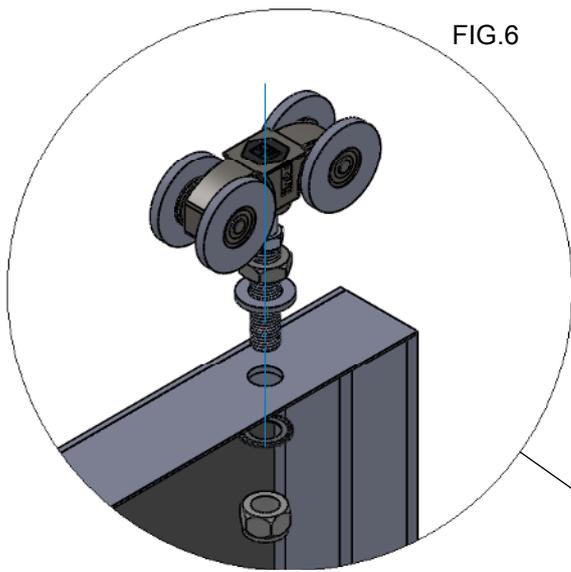

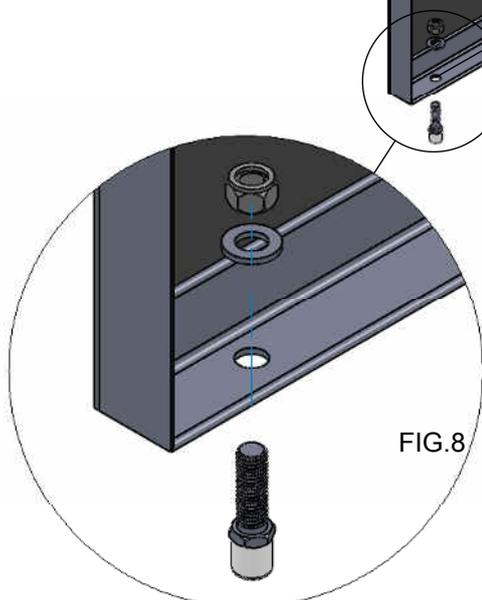

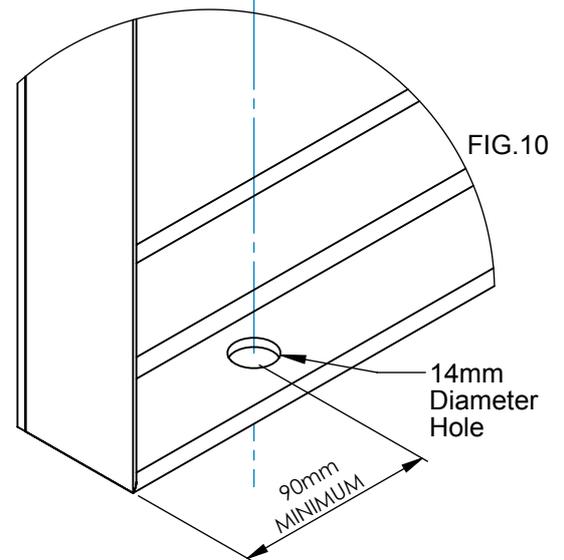

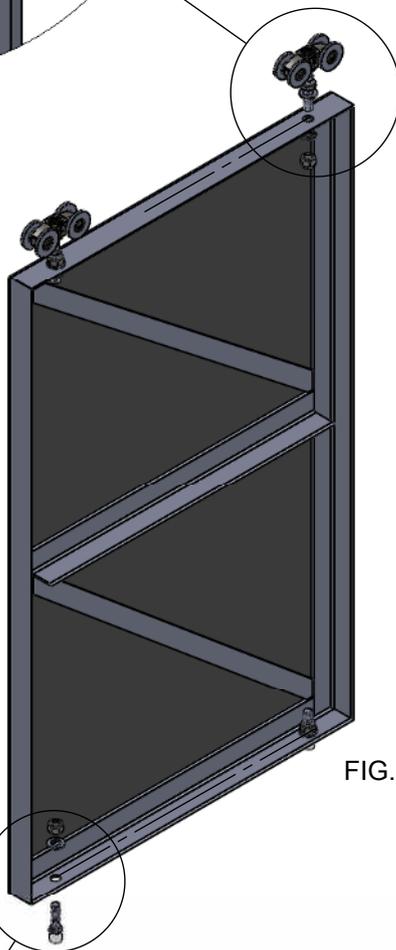

FIG.5

METAL DOORS

Drill two 14mm diameter holes on the top and two on the bottom edge of the door as shown in fig.9 & 10. Make sure the holes are laterally in line.

Fit **Hangers assembly** with pendant bolt locating through the 14mm holes. Secure the hanger using the **M12 'Staytite' Nut** as shown in fig.6.

Fit **Bottom Roller Guides** on the bottom edge of the door using the appropriate fixings supplied as shown in fig.8.

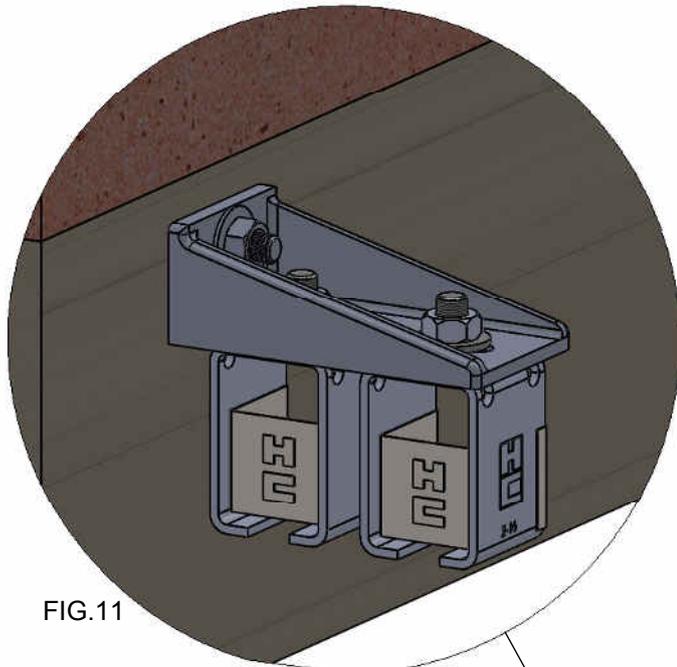

FIG.11

Securely fix the **Double Side Wall Brackets** to the lintel perfectly level throughout, except for the one at the furthest end to the door opening, which should be temporarily fitted with the **Closed End Pieces** in place. This will be fixed after the hangers are securely in the tracks. See fig.11 & 12

Fit a Closed End Piece in the Side Wall Bracket nearest to the door opening. See fig.11

NB
Fixing bolts to be compatible with type of lintel.

Where deemed necessary, use timber packers to ensure brackets are fixed in line.

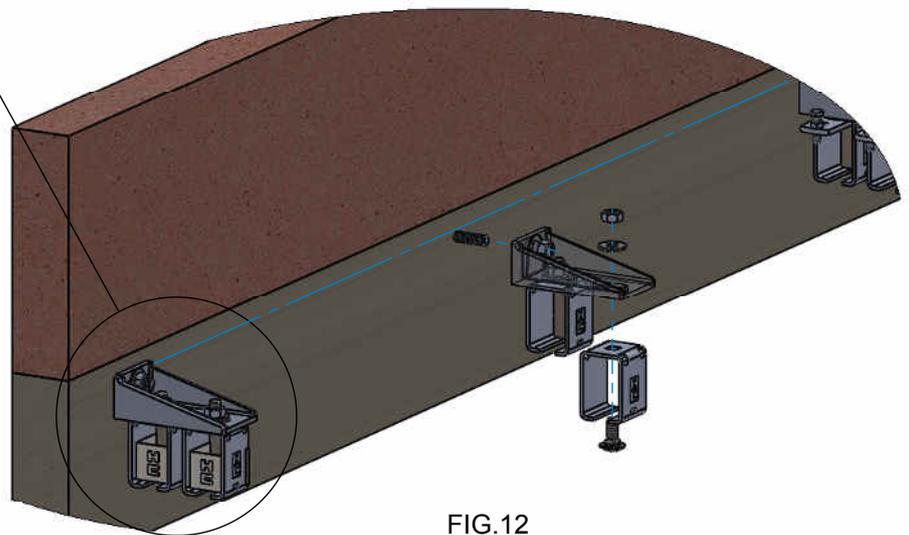

FIG.12

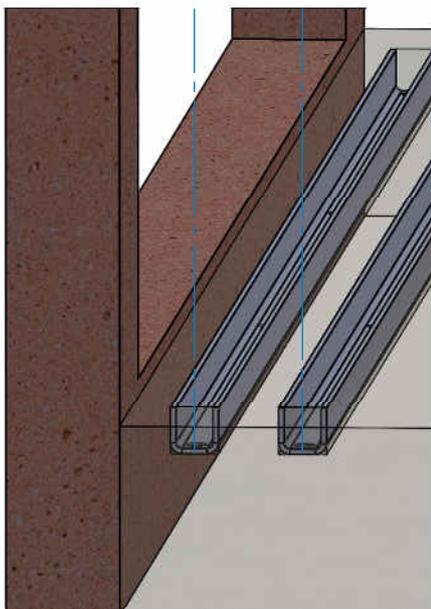

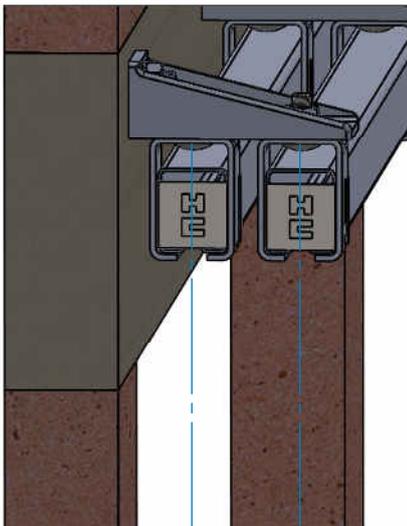

FIG.13

Fit **2-16 tracks** through the Double Side Wall Brackets mounted on the lintel. See fig.13

Fix **Floor Channels** so that centre of channel is plumb with centre of top track, using a plumb bob or a spirit level hung centrally in track. Make sure the channel is flush with floor level.

Insert the first track through the brackets making sure it fits into the closed end piece. You might have to disassemble some of the brackets for easy access as shown in fig.14.

FIG.14

Raise doors and insert hangers into tracks. Reassemble some of the brackets to fit the second track, in line with the first.

Repeat these steps for the next row of track as shown in fig.15.

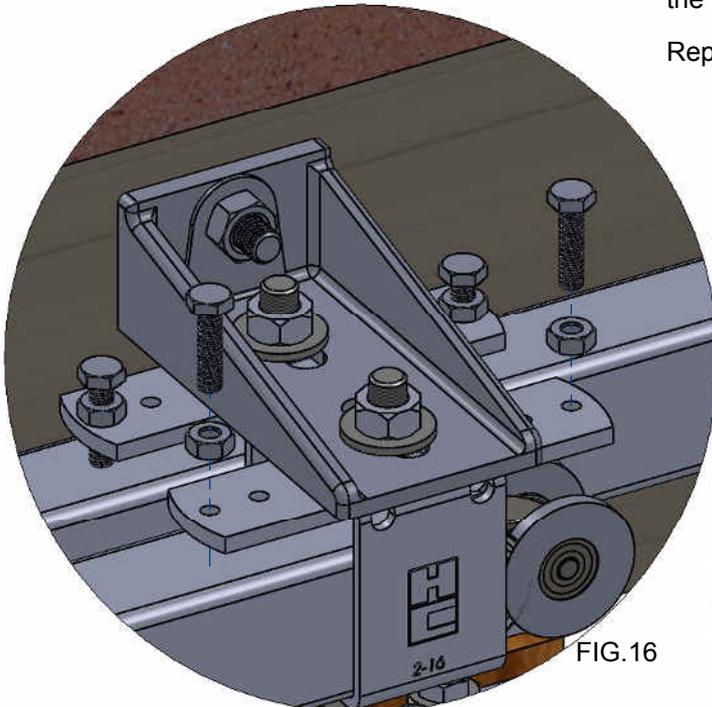

FIG.16

The lock-joint double side wall bracket should be used where the track join occurs. See fig.16

NB
Closed end piece **are not** to be treated as door stops. Independent ones should be used either on the wall or at ground level.

FIG.15

Slide the doors to the other end of the tracks before undoing the temporary fixed Double Side Wall Bracket so as to fit Closed End Pieces. Secure it to the lintel, see fig.17.

Adjust hangers to obtain correct clearance under door, adjust laterally as required and tighten lock nuts, see fig.18.

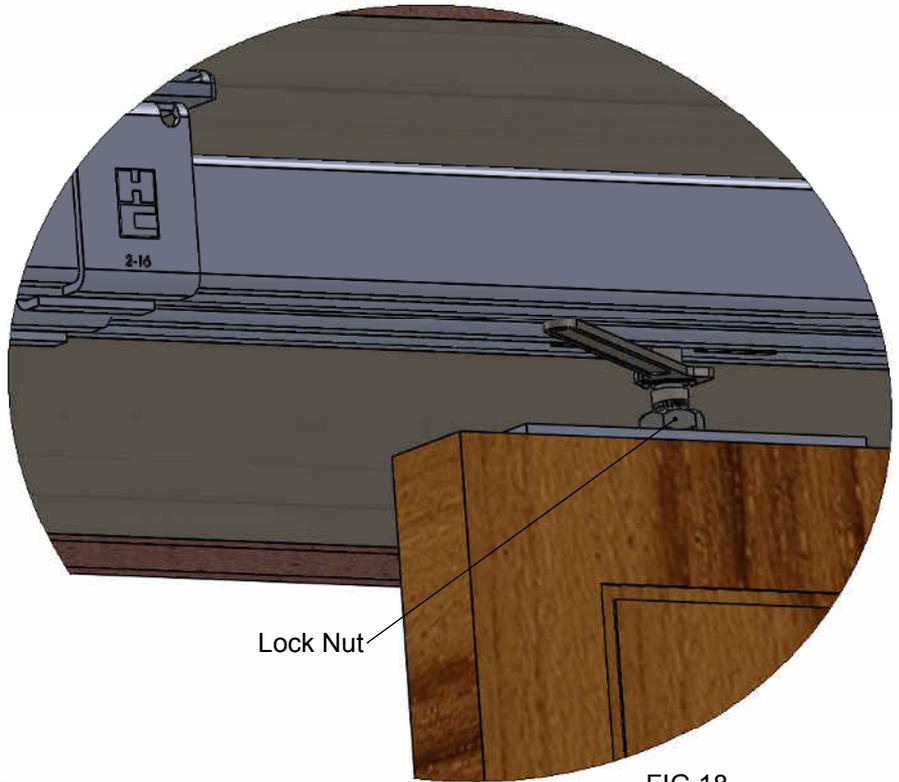

FIG.18

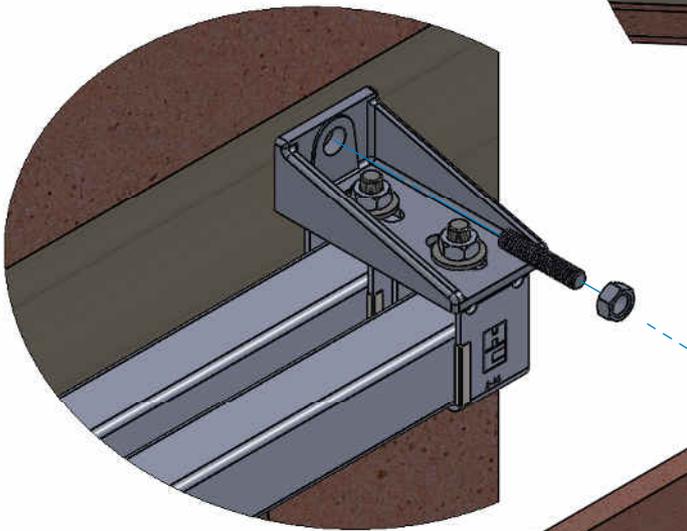

FIG.17

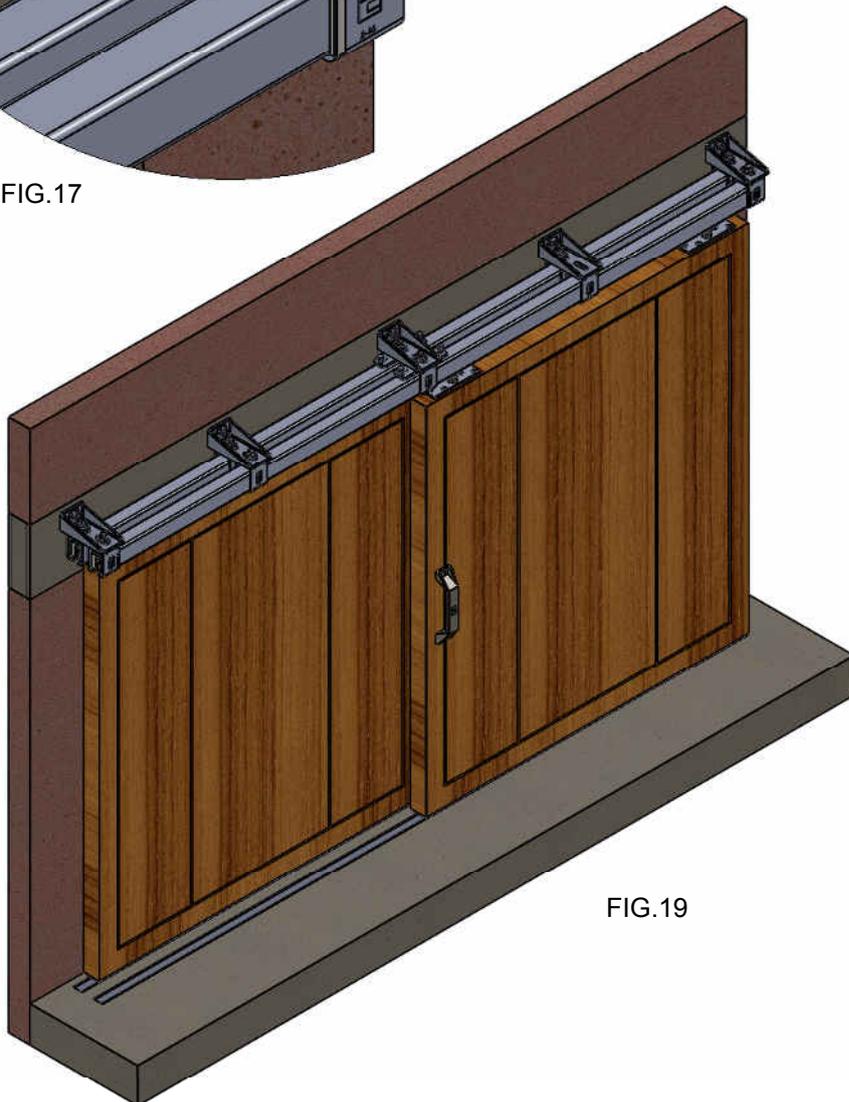

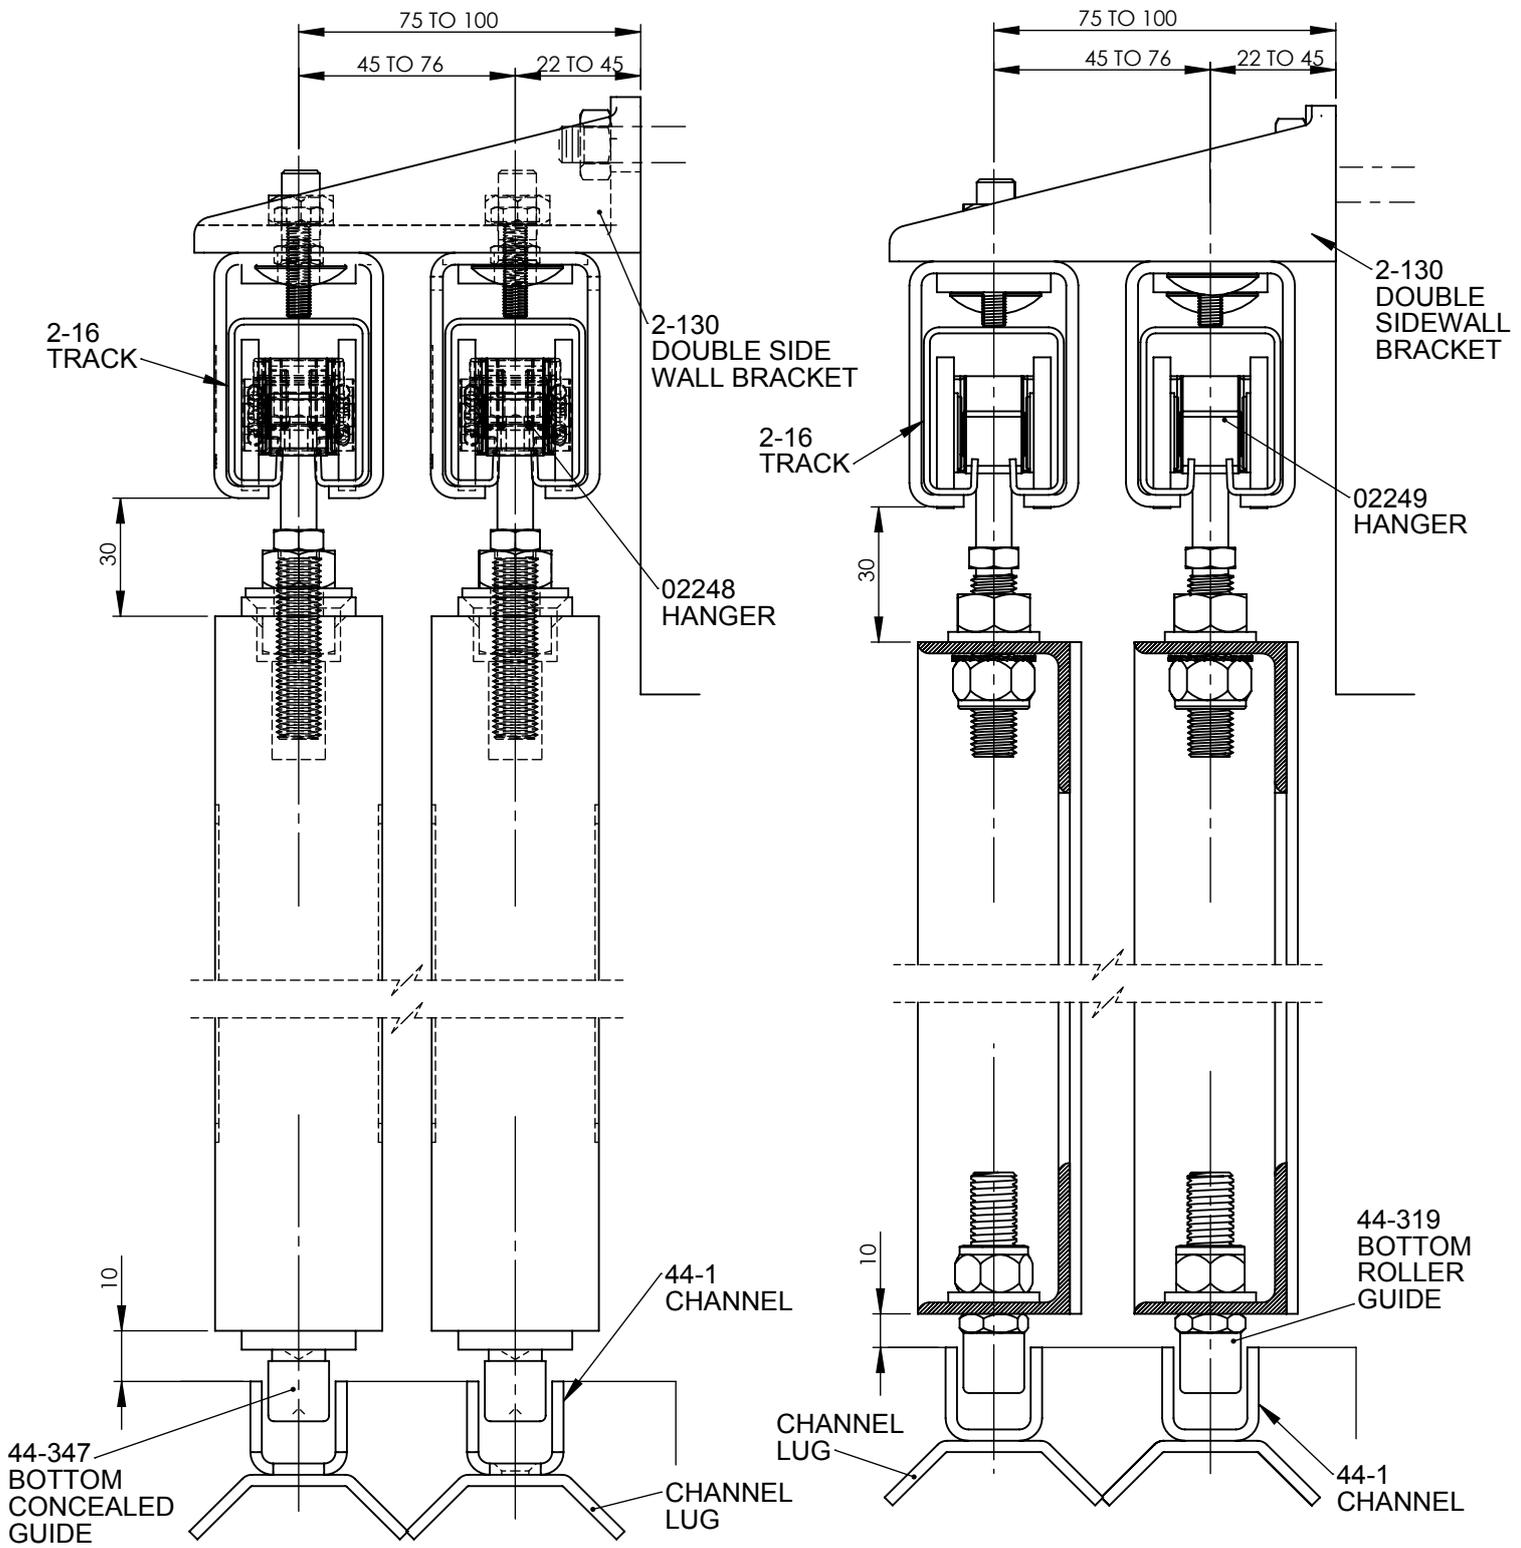

FIG.19

TIMBER DOOR SECTION

STEEL DOOR SECTION

Track End Stop 02718

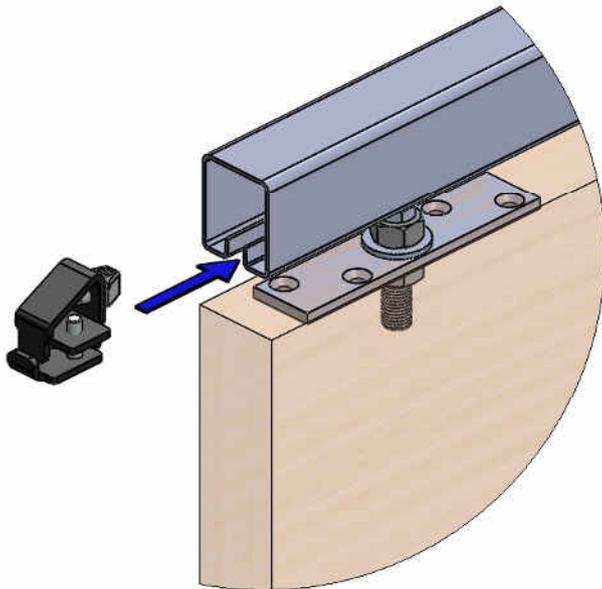

FIG.20

Note:
Fig21 shows the 02718 track stop is fixed flushed to the edge of the track.

Note:
In Fig20 blue arrow shows the 02718 track stop inserted into the track. Then use allen key to tighten the screws.

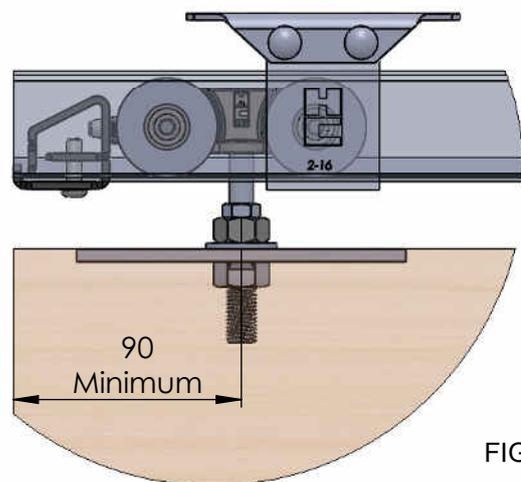

FIG.21

INSTALLATION AND MAINTENANCE INSTRUCTIONS:

Clean out channel, grease copiously inside of the top track and repeat at intervals.
Check all bolts, nuts and screws are securely tightened.
